Middletown Receives Prestigious Sustainable Maryland Certified Award at Maryland Municipal League Conference

College Park, MD (October 12, 2022) – The Environmental Finance Center at the University of Maryland announced that **Middletown** was one of seventeen Maryland municipalities honored at the **Sustainable Maryland Awards Ceremony** at the Maryland Municipal League’s annual Fall Conference on Tuesday. The Town was certified at the new Silver level.

A detailed summary of Middletown’s sustainability Actions can be found in their Certification Report, attached as a PDF.

“It is an honor to be re-certified as a Sustainable Maryland municipality”, said **Burgess John Miller**. “We continue to go green in Middletown, planting over 300 trees in the last two years to help create a sustainable and Tree City USA town. Our Sustainability Committee continues to save the Town and our residents money by implementing the only community-wide composting site in Frederick County. Because of efforts like these and much more, our Sustainability Committee continues to greatly improve our quality of life in Middletown.”

According to **Mike Hunninghake, Director of the Sustainable Maryland program**, “We are pleased to be awarding a record number of certifications this year. These certifications show a commitment to sustainability by Maryland’s municipalities that is truly impressive in both depth and breadth. The commitments and associated actions are a critical investment for a future where local governments will increasingly be at the forefront in the fight against climate change. Sustainable Maryland stands ready to support and celebrate these communities, elected officials, and Green Teams.”

- Total Municipalities Sustainable Maryland Certified: **41 (26% of Maryland's municipalities)**
 - Total Municipalities Sustainable Maryland Registered: **89 (57% of Maryland's municipalities)**
-

About Sustainable Maryland: Sustainable Maryland is an initiative of the **Environmental Finance Center at the University of Maryland** that is designed to support Maryland's 157 municipalities as they look for cost-effective and strategic ways to protect their natural assets and revitalize their communities. Using best practices in resource areas like water, energy, planning, health, food, and economy, a municipality can earn points toward sustainability certification. **Sustainable Maryland** offers a customizable menu of concrete actions, allowing communities to select initiatives that best fit their specific needs. This free and voluntary program, with the support of the **Maryland Municipal League and the US Environmental Protection Agency** helps communities choose a direction for their greening efforts; complete their chosen actions with help from program tools, trainings, expert guidance, and other resources; and be recognized statewide for their accomplishments.
