

Installation of New Water and Sewer Connections in Existing Streets (11/2022)

Please reference the Town of Middletown's "Standard Water and Sewer Notes" and "Standard Details for Construction" for installing new services in existing Town streets.

Please reference the Town of Middletown's "Standard Trench Bedding and Backfilling" notes for the bedding and backfill requirements and that a Town Representative must be present during the tap and inspect the pipe work prior to it being backfilled.

Please reference the Town of Middletown's "Standard Paving Notes" and "Standard Details for Construction" for paving restoration requirements.

The copper tube must be one piece from the corporation stop to the meter yoke located in the meter pit.

The Applicant must pay the following fees at the prevailing rate prior to connection and installation of the meter:

1. Tapping Fees and Impact / Improvement Fee
2. Water Meter Fee

For connections to existing terra cotta sewers there are 3 businesses' that are capable and acceptable to the Town to perform this type of work:

1. Mid Atlantic Utilities, Inc.
2. Satterfield Enterprises, Inc.
3. C. J. Miller, Inc.
4. Others by Approval

Information located in the aforementioned Town of Middletown notes and details should be referenced and utilized to plan and perform this work.

Proposed construction plans/schematic and associated shop drawings should be submitted to the Department of Public Works before an onsite meeting shall be conducted to discuss the utility installation and traffic control that will be provided by the contractor.

Please contact the Public Works Department with any questions. 301-371-6171.
